

BM21-S Plate & Pipe Beveller

A new generation portable bevelling machine designed for bevelling both stainless steel plate and pipes with ease and accuracy.

NEW
Model for
Stainless Steel
applications

Features:

- Single milling head equipped with 10 square inserts, simplifying the matching process.
- Fast and easy exchange of insert with no need to special adjustments.
- Extended work range from 0 to 60 degrees with continuous angle adjustment.
- Easy setting of bevel angle and width.
- Vibration insulation providing added protection for both user and machine.
- One universal guide plate for bevelling both plates and pipes which replaces 3 different attachments used with the BM20.

SPECIFICATIONS

MODEL	BM21-S
Motor	1.6kW
Maximum Bevel Width	21mm
Motor Speed	1560 RPM
Angle Range 0-60°	with continuous angle adjustment
Tooling	Integrated milling head with 10 square adjustments
Weight	23kg
Power Supply	230VAC/50Hz or 115 VAC/60Hz
